**DETAILED ACTION**  
**Election/Restrictions**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

1. Claims 1-75, are drawn to a method of performing business trading in financial processing in a computer, classified in class 705, subclass 37.
2. Claims 100-232, are drawn to a method of performing business trading in financial processing in a computer, classified in class 705, subclass 37.
3. Claims 76-77, are drawn to Graphical manipulation of software object, classified in class 349, subclass 619.
4. Claims 79-99, are drawn to GAU displaying data classified in class 715, subclass 700.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group 1 and Group 2 are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used to practice another materially different process such as reservation database system.
3. Inventions Group 3 and Group 4 are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the apparatus can be used for making a different product such as providing telecommunication services in a database system.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3628

5. Because these inventions are distinct for the reasons given above and the search required for Group 1 and 2 is not required for Groups 3 or 4, restriction for examination

purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
